

CEDAR FALLS AQUATIC CENTER

This modern municipal aquatic facility is more than just a pool. Featuring three unique areas, there is a children's pool with slide fountains and interactive play structures; a tube slide and lazy river; and a 25 meter pool with lanes, a diving board, a diving platform, and a drop slide.

AVANT ACOUSTICS provided the following services:

- Sound reinforcement system design
- On-site system commissioning including operator training and assistance during the first use

Project Highlights:

AVANT ACOUSTICS designed and commissioned the sound reinforcement system to include routine paging communications to patrons as well as sports announcing during competitive swimming events.

Project Location:

Cedar Falls, Iowa

Facilities:

Water Park

Client:

Water's Edge Aquatic Design

Designer:
