

UNCA CENTER for HEALTH PROMOTIONS and PARTNERSHIPS

The Center for Health Promotions and Partnerships at the University of North Carolina in Asheville includes academic classrooms, labs, and studios, as well as the Kimmel Arena, a 3,400-seat multipurpose arena that supports the University's basketball programs.

AVANT ACOUSTICS provided the following services:

- Architectural acoustics and mechanical noise consultation
- Audio, video, and scoreboard system designs
- On-site system commissioning including operator training and assistance during the first use

Project Highlights:

AVANT ACOUSTICS's design included full in-house audio and video production capabilities for game day and other live events. Infrastructure and connections are available throughout the facility to support remote broadcast and other third-party productions. Kimmel Arena's experience is highlighted by a central loudspeaker cluster, two large LED video boards, and a centrally hung four-sided scoreboard providing patrons with all of the sights, sounds, and game day information needed.
