

MAIZE CAREER ACADEMY BROADCAST STUDIO

The Maize Career Academy offers students advanced career curriculums, including audio visual communications, nursing, graphic design, aeronautical engineering, and culinary arts. The facility itself includes a broadcasting studio, which will develop and air content to the entire school district.

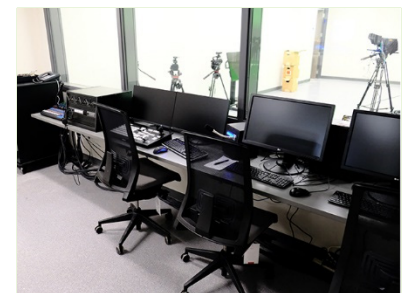

AVANT ACOUSTICS provided the following services:

- Broadcast studio and control room system design
- On-site system commissioning including operator training and assistance during the first use

Project Highlights:

AVANT ACOUSTICS designed the professional-level, multi-camera production studio and control room to include a production video switcher/processor, production intercom and headsets, teleprompters, confidence monitors, interruptible foldback system, and green screen backdrop. Features include:

- Three HD studio cameras with integrated teleprompters
- Production switcher/processor supporting up to four simultaneous live video sources of various types and resolutions with on-board recording
- HD live streaming with simultaneous archiving
- Custom-fitted seamless cyclorama-style green screen
