

MONTICELLO LIBRARY

This two-story, 30,467-square-foot library has floor-to-ceiling glass along three sides of the building. Its interior incorporates flexible walls so that spaces can be adapted to meet a multitude of needs.

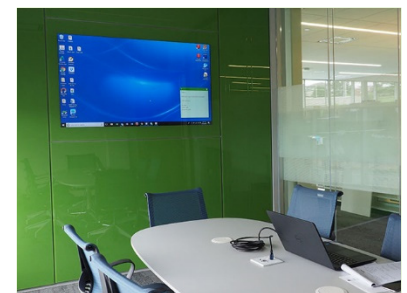

AVANT ACOUSTICS provided the following services:

- Audio-visual systems design
- Sound reinforcement system design
- Paging system design
- Architectural noise control
- On-site system commissioning including operator training and assistance during the first use

Project Highlights:

AVANT ACOUSTICS provided building-wide paging, study room video collaboration, and meeting room presentation systems design as well as consultation on room acoustics and mechanical noise control.

In addition to the audio-visual systems for public use, AVANT designed a noise masking system for the open-office staff areas behind the scenes. Full system commissioning was also provided to make sure that all the systems performed their best and that all the Library's needs were met.

Project Location:
Shawnee, Kansas

Facilities:
Meeting Room, Conference Room, Study Rooms
